

P3 All-Around - Spring Automatically Adjusting Load Leveler

The P3-Spring Level Loader improves the efficiency of manual pallet loading and unloading jobs by eliminating bending, stretching, and walking around the pallet. Heavy-duty springs and shock absorbers lower or raise pallets as boxes are added or removed. An anti-friction turntable top lets workers stand in the same position throughout the loading and unloading process.

The P3-Spring is designed so that its base and all components fit within the diameter of the turntable ring. This allows workers to stand up close to the unit at any position around the ring with no obstructions to reach over.

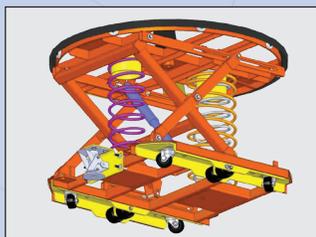

P3 All-Around Spring Features

- Load height adjusts automatically.
- No power required.
- Low-friction turntable for nearside loading.
- Extremely stable base - no lagging required.
- Integral fork pockets for easy relocation.
- Load capacities from 400 lbs. to 4,500 lbs.
- Stainless steel or galvanized units available.

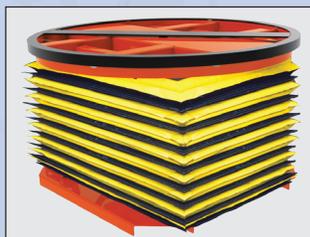

Options & Accessories - Available for pneumatic and spring units

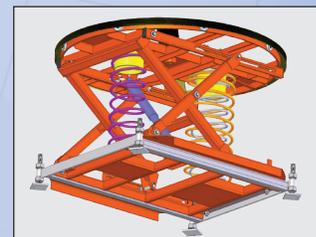

Disc Covers / Solid Tops

Portability Packages

Bellows Guard

Leveling Feet

Model	Capacity	Raised Height	Low Height	Overall Base	Turntable	Weight
P3-AA-Spring	400 - 4500 lbs.	28"	9 1/2"	36" x 36"	43 5/8" diameter	460 lbs.

P3 All-Around - Pneumatic Automatically Adjusting Load Leveler

The P3 All-Around Pneumatic Level Loader improves the efficiency of manual pallet loading and unloading jobs by eliminating bending, stretching, and walking around the pallet while carrying heavy loads.

Leveling is accomplished by a heavy-duty, reinforced airbag that can handle loads up to 4500 lbs. After filling the airbag with shop air or portable compressor, the P3 All Around can be disconnected and moved to other locations. The P3 can accommodate loads that vary substantially in weight (from 400 - 4500 lbs.) so one unit is versatile enough to work in several areas.

A turntable top with anti-friction bearings allow users to spin loads so they are always working from the near side without having to walk around the unit.

P3 All-Around Pneumatic Features

- Load height adjusts automatically.
- No power required.
- Ideal when loads / weights vary frequently
- Low-friction turntable for nearside loading.
- Extremely stable base - no lagging required.
- Integral fork pockets for easy relocation.
- Load capacities from 400 lbs. to 4,500 lbs.
- Stainless steel or galvanized units available.

Automatic Load Height Adjustment

Model	Capacity	Raised Height	Low Height	Overall Base	Turntable	Weight
P3-AA-Pneumatic	400 - 4500 lbs.	27 3/4"	9 1/2"	36" x 36"	43 5/8" diameter	400 lbs.
