

DRIVER FATIGUE MONITORING SYSTEM

RVS-350

REAR VIEW
SAFETY
REVERSE WITH CONFIDENCE™

DESCRIPTION

The RVS-350 is a vehicle safety product that can accurately predict drowsiness in drivers and alert them at such a time. It's installation is instant and requires no calibration or setup. Simply place the camera on the dash facing the driver and it will detect the alertness of the person operating the vehicle, making sure their attention never wavers.

SPECIFICATIONS

Technology

Advanced face recognition and patented pupil detection technology

Usage

Suit for all vehicles
